EC Regulation 2005

Beekeeping

ANNEX I

C. BEEKEEPING AND BEEKEEPING PRODUCTS

1. General principles
1.1. Beekeeping is an important activity that contributes to the protection of the environment and agricultural and forestry production through the pollination action of bees.

1.2. The qualification of beekeeping products as being from organic production is closely bound up both with the characteristic of the hives' treatments and the quality of the environment. This qualification also depends on the conditions for extraction, processing and storage of beekeeping products.

1.3. When an operator runs several beekeeping units in the same area all the units must comply with the requirements of this Regulation. By derogation from this principle, an operator can run units not complying with this Regulation provided that all the requirements of this Regulation are fulfilled with the exception of the provisions laid down in paragraph 4.2 for the siting of the apiaries. In that case, the product cannot be sold with references to organic production methods.
